SUMMARY

Computer Science and Artificial Intelligence undergraduate Software Engineer, Java Developer. Proficient in Java, Python, SQL, Spring Framework, REST APIs, JDBC, Hibernate, JPA, and MySQL with hands-on experience developing scalable web applications, database optimization, and machine learning solutions. Strong foundation in Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), problem solving, and writing clean, maintainable code.

TECHNICAL SKILLS

- **Programming Languages:** Java(Java 8), Python(Machine Learning), SQL
- **Frameworks & Backend:** Spring Boot, Spring Core, Spring MVC, Hibernate, JPA, REST APIs, JDBC
- **Web Technologies:** HTML5, CSS3, JavaScript
- **Database:** MySQL, Oracle, SQL, Database Normalization, Indexing, ACID Properties
- **Tools:** Git, GitHub, Eclipse, VS Code, Postman
- **Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC

PROJECTS

InstantPick – Multi-Vendor E-Commerce Platform

[View on GitHub](#)

Java 21, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, MySQL, HTML5, CSS3, JavaScript, REST APIs

- Developed a multi-vendor e-commerce platform supporting Customer, Seller, and Admin roles with role-based workflows for shopping, product management, order processing, and platform administration.
- Implemented customer features including product search/filtering, wishlist, cart, address management, checkout, order tracking, cancellations, returns, and verified product reviews.
- Implemented seller and admin workflows for product management, inventory, orders, seller approvals, customer monitoring, sales analytics, and notifications.
- Designed REST APIs and 3-tier architecture using Spring Boot, Spring Data JPA, Hibernate, and MySQL, with BCrypt authentication, validation, transactional operations, and automated testing.

Placement Readiness & Prediction System

[View on GitHub](#)

HTML5, CSS3, JavaScript, Flask, REST API, SQLite, Random Forest

- Built a backend-integrated machine learning model using Random Forest to predict placement readiness based on CGPA, coding skills, communication scores, and resume analytics.
- Developed a hybrid resume parser using NLP techniques (TF-IDF, cosine similarity) to compute ATS scores and extract structured features from PDF/DOCX resumes.
- Implemented REST APIs for Authentication & Authorization, scoring, analytics aggregation, CRUD operations and automated risk alerts.
- Created real-time dashboards for student and TPO analytics visualization.
- Integrated automated email alert system for early identification of at-risk students.

Weather Wizard

[View Project](#)

HTML5, CSS3, JavaScript, REST API

- Integrated weather API for real-time city-based weather retrieval using asynchronous API calls.
- Optimized DOM rendering and implemented error handling for API failures and invalid inputs.

EXPERIENCE

Web Development Intern

May - June 2025

Skill Dzure

- Developed responsive UI components using HTML5, CSS3, and JavaScript.
- Collaborated on debugging front-end issues and improving code structure.
- Managed version control workflows using Git and GitHub branches.

AI and Prompt Engineering Intern

May 2025

Vault Of Codes

- Designed, optimized, and evaluated structured AI prompts to improve AI task clarity and response consistency.
- Conducted iterative testing and analysis to refine automation workflows.

EDUCATION

- **B.Tech in Computer Science and Artificial Intelligence** 2022 – 2026
St. Johns College of Engineering and Technology, Yemmiganur
- **Intermediate(MPC)** 2020 – 2022
Dr. Jyothirmayi junior college, Adoni
- **Secondary School Of Certificate** 2020
Sri Vivekananda EM High School, Adoni
